Multimedia4Linux 3D-printing license

2019-11-10, Rev. 00

Copyright:

Creator and designer: Holger Klemm, Multimedia4Linux 2019

General:

All 3D models from this ZIP file are subject to this license. The 3D models in the Zip archive are password protected. By unpacking the password-protected Zip archive you accept this license.
In case of infringement of the license, we reserve the right to take legal action.
All files are in STL format.

The password for unpacking the 3D models is: **2943_Xkh57#te**

You are free to:

- Unlimited printing

Under the following terms:

- **NoDistibution**
  It is not allowed to redistribute the data and license text. You may, however, distribute a link to the data.

- **NonCommercial**
  Commercial use is not allowed. You may not sell the CAD models, nor the printed 3D models. Also, the creation of tools for series production is not allowed.

- **NoDerivatives**
  It is not allowed to change the CAD models.

3D printing recommendations:

The case parts are designed for the HP Multifusion 3D printing process. The polyamide material may be colored black. Printing with the SLS or SLA procedures should also be possible.
The LED glasses are designed for the SLA process with a glass-clear material.
